

NOTICE OF PUBLIC INFORMATION CENTRE #1 FOR THE ENVIRONMENTAL SCREENING

Navitus
PLASMA INC.

Dufferin County Energy from Waste Facility

Wednesday, October 26, 2011
Shelburne Sports Centre
Shelburne, Ontario
4:00 pm – 8:00pm

What is Being Proposed? Navitus Plasma Inc. (Navitus) has initiated an Environmental Screening of its proposed energy-from-waste facility that will utilize the commercially proven Westinghouse Plasma Gasification technology (the "Project") to process post-diversion residual wastes as a source of alternative energy supply. The Project is being carried out as an Environmental Screening under Ontario Regulation 101/07 of the *Environmental Assessment Act*. The facility is proposed to be located within the Dufferin County Eco-Energy Park (DEEP), located at 195620 Amaranth East Luther Townline. (See the map, below).

Progress to Date: The Proponent published the Notice of Commencement for the Environmental Screening in June, 2011 together with the "Opportunity Statement" for the Project and a summary description of the Project. To date, Navitus, in cooperation with the County of Dufferin, has: set up a Project web site (www.navitusplasma.com); undertaken initial liaison with regulatory agencies and Aboriginal communities; and completed a "preliminary" outline of potential environmental effects, concerns and issues to be addressed by the Screening. This outline of "potential effects" has been documented in the "preliminary" Criteria Checklist and posted on the Project web site for consideration.

At This Public Information Centre: Information will be displayed on: the background to the County of Dufferin's DEEP initiative; the plasma gasification technology that Navitus proposes to use at the facility; the Project-development schedule; and the Environmental Screening and Approvals processes to which the Project must comply.

Consultation: You are invited to attend this Public Information Centre (PIC) to review, discuss and then comment on the information displayed. Members of the Study Team will be available to answer your questions. There will be opportunity for you to provide your comments and questions in writing at the PIC venue. You may also provide your input either in writing or you may post it on the Project web site up to two (2) weeks following

the Public Information Centre. Your feedback is an important part of the Screening process and all comments will be considered by the Study Team.
